

The Rapid Surface Transportation Center

*Challenge:
Develop a Surface
Transportation
Center to be
located on an
existing municipal
commuter parking
lot. The design
captured the civic
importance of
public
transportation and
is functional and
aesthetically
noteworthy.*

- bus pulse/transfer center
- ticketing/waiting/concession facility
- air rights development
- future light and heavy rail facilities
- LEED certified
- "green lease" facility
- brownfield redevelopment, recycled-content and low-voc materials throughout, extensive daylighting, "heat island" minimization
- Grand Rapids, MI
