

## Kewadin Casinos Hotel and Convention Center

*Challenge: Create a major destination quality resort addition to a Northern Michigan Native American casino*

- a three-story meandering concourse "trail" connecting to the casino's central skylit galleria draws people along the resort amenities of hotel lobby, shops, nightclubs, restaurants and gaming activities. The trail organizes the major program elements: a 1,500-seat performing arts theater with flyspace; a 25,000-square-foot conference center with ballrooms and meeting rooms; and the 275 room high-rise hotel and 42 suite low-rise motel
- for hotel guests, a full health club with swimming pool, spa, and saunas overlook a more tranquil portion of the resort
- the complex is further supported by a commercial laundry, kitchens, truck docks and all back of house business, operational and security departments
- the project was constructed structurally on steel piling driven to bedrock, 200 feet deep
- Sault Ste. Marie, MI
