

Jamestown Charter Township Water System

Challenge: Initiate a quality public water system with local financial resources.

- water supply to two communities; Jamestown Township and City of Hudsonville
- water source is a 16" connection to the City of Wyoming's 42" transmission main
- water booster pump station has a pumping capacity up to 3,000 gallons per minute
- local/remote monitoring and control with variable pumping rate
- 25,000 feet of 8" to 16" public watermain installed since 1996
- Hudsonville, MI
