

## Hotel Zakho

*Challenge: Provide architectural design in 10 days.*

- The basic form of the hotel responds to the site and land form. By taking advantage of the rich views towards the south side, a circular form is created that focuses on the valley.
- All the hallways have a view outside towards the river and city.
- The first impression of the building from the main road is two translucent elements merging in harmony towards a transparent 'knuckle' element.
- 350 room hotel with restaurant, conference room, hair salon, pool and wellness room, and an outdoor garden and deck.
- Zakho, Iraq
