

## Grand Valley State University Fred M. Keller Engineering Laboratories

*Strategy: Be responsive to the community by working with area businesses to design lab addition.*

- 33,000-square-foot addition adjacent to the Eberhard Center
- two parallel, two-story wings of specialty labs with balconies and mezzanines to facilitate student/faculty interaction
- “peel away” surface materials teach students about construction and function
- designed with West Michigan businesses with plans for co-op space
- Grand Rapids, MI
