

## Lake Michigan College M-TEC Facility

*Challenge: Use our understanding of learning communities and integration of technology to create an exciting learning environment on a very tight budget and schedule on a brownfield site.*

- faculty office space, traditional classrooms, computer classrooms, and manufacturing labs
- incorporates partnerships with businesses and schools
- simulate a modern office and manufacturing factory
- use the existing natural landscape, accommodate wetland conservancy, and incorporate security
- facility to attract non-traditional and adult learners, meeting the vocational education needs of the community under the state of Michigan's M-TEC program
- supports future expansion
- Benton Harbor, MI
