

Before

After

Harrison Park School

Grand Rapids Public Schools

Challenge:

Renovate the school and bring it to contemporary learning standards, allowing flexibility for future changes, and keeping the overall exterior aesthetic, all while keeping the school in operation.

Results:

"...The projects Progressive have designed are some of the best examples in the nation of converting older school buildings into state-of-the art learning centers. They are to be applauded for their outstanding work redesigning 1920s school buildings into sustainable facilities, maintaining the historic integrity, and creating viable 21st Century educational spaces.."

- William S. DeJong
CEO, DeJONG Inc.

- complete renovation of an original 1928 school building
- 164,000-square-foot renovation to k-8 building, 64,000-square-foot new addition
- USGBC LEED Silver Certification
- interior details were either maintained or their "feel" recreated with modern technologies and applications
- Grand Rapids, MI
